Herzenberg, S. (2013, July 24). PA regions rank high in study of upward mobility. Retrieved March 6, 2017, from <http://keystoneresearch.org/publications/research/pa-regions-rank-high-study-upward-mobility>

School district data demonstrating enrollment and proficiency on the grade 3 and grade 8 Pennsylvania System of School Assessments (PSSA) were compiled for all school districts. This was combined with data showing the district adequacy targets and state funding needed to achieve adequacy under the new state education formula. District expenditures to determine the percent the district spends as compared to the adequacy target were also included.

2015-16 Public School Enrollment (pulled 7/20/16), 2015-16 State and District PSSA results, 2014-15 Annual Financial Report (8/30/16), Pennsylvania Department of Education.

District adequacy target and state share increase needed to achieve adequacy under the state funding formula, Public Interest Law Center (12/27/16).
